

# Otway Offshore Project

## Drilling locations and timings

Information Sheet | 12 November 2021

### Project overview

Beach Energy is continuing development of the Otway basin offshore natural gas reserves to ensure ongoing production at the Otway Gas Plant (near Port Campbell), which supplies natural gas to the Australian east coast gas market. We are drilling several wells in Commonwealth waters, ranging from 32 to 80 km from Port Campbell. For detailed project information click [here](#).

### Timing and locations

Drilling commenced in February 2021 and is expected to be completed by end of December 2022, followed by activities through to mid-2023 to tie-in the new wells to the existing pipeline and platform. The remaining Thylacine wells to be drilled will take between 70 and 90 days each, depending on weather conditions. Drilling sequence from first to last is in the table below:

Well name	Latitude (S)	Longitude (E)
<sup>1</sup> Artisan-1	38°53.491'	142°52.928'
<sup>1</sup> Geographe-5	39°6.480'	142°57.084'
<sup>1</sup> Geographe-4	39°6.494'	142°57.067'
Thylacine North-1	39°12.510'	142°52.495'
Thylacine West-2	39° 13.332'	142° 50.310'
Thylacine West-1	39° 13.336'	142° 50.336'
Thylacine North-2	39° 12.284'	142° 51.557'

<sup>1</sup>Drilling completed.

### Safety exclusion zones

Vessels in the area are required to observe a 500 m radius Petroleum Safety Zone (PSZ) around the drilling rig and a further 2 km radius cautionary zone for avoidance of the rig's mooring chains and anchors. A Notice to Mariners will be issued by the Australia Hydrographic Office. PSZs will remain in place for well heads and new PSZs will be created for seabed infrastructure required to connect the well heads to the existing Thylacine pipeline and offshore platform (see map).

### Anchors and mooring chains

Anchors and buoys will be pre-laid around late November 2021 (subject to weather) at the following coordinates for Thylacine West 1 and 2.

Line	Northing (m)	Easting (m)	Latitude (S)	Longitude (E)
1	5,656,280	658,811	39° 13' 41.72"	142° 50' 23.57"
2	5,656,402	658,348	39° 13' 38.07"	142° 50' 4.17"
3	5,656,895	658,063	39° 13' 22.28"	142° 49' 51.87"
4	5,657,356	658,190	39° 13' 7.25"	142° 49' 56.78"
5	5,657,607	658,623	39° 12' 58.82"	142° 50' 14.61"
6	5,658,045	659,157	39° 12' 44.27"	142° 50' 36.50"
7	5,656,773	659,894	39° 13' 25.02"	142° 51' 8.30"
8	5,656,531	659,244	39° 13' 33.30"	142° 50' 41.41"

Anchor locations for other wells to be advised.

### Drill rig and support vessel details

Marine users can communicate with the drilling rig and support vessels at any time via channel 16 or the contact details below:
