

14-Nov-2021 09:30 UTC (20:30 LT)
 Julian day 318.
 Position: 40°18.22'S 145°54.19'E
 CMG 130°
 BSP 4.0 Knots.

Geo Coral is currently down for weather

After completing Seq 007 the vessel went down for weather and recovered the gun arrays.

The plan is maneuver to the SE taking shelter above Tasmania as shown on the right until approximately 6am LT on the 15th. Timing to the right is in UTC and subject to change.

Below shows the planned shooting plan as derived in SurvOPT. Timing is subject to change pending the weather and planned streamer maintenance.
